

Hand-Penned Petals Week – Project 3 @LetItSnowStamping.com

Today's project is geared toward the beginner stamper. All you need for the card is a card base, some Designer Series Paper, circle die or punch, dimensionals, and a sentiment!

Supplies:

- Misty Moonlight Cardstock
- Hand-Penned Designer Series Paper
- Scrap of Basic White Cardstock for sentiment
- Layering Circles Dies or circle punch
- Sweet Ice Cream sentiment, or other longer sentiment
- Misty Moonlight ink pad
- Multipurpose Liquid Glue
- Stampin' Dimensionals
- White Baker's Twine
- Glue Dots
- Paper Snips Scissors

Instructions:

Begin by cutting out 12 (1-3/8") circles from the DSP using either the Layering Circles Dies or a circle punch.

Glue and position circles on the Misty Moonlight card base, measuring 8-1/2"x5-1/2", scored and folded at 4-1/4", in a grid pattern using the liquid glue. The liquid glue is more forgiving and allows you to slide the circles into place if needed.

Once you have all of the circles glued in place, set something heavy on it while it dries. I use my large Clear Block F because it is thick, has some weight to it, and covers the entire card base at once.

Once it dries, trim the circles with Paper Snips Scissors if there is any overhang

On a scrap piece of Basic White cardstock, measuring 4"x1-1/4", stamp the sentiment using Misty Moonlight ink. Here I used the Happy Birthday sentiment from the Sweet Ice Cream stamp set. When you stamp the sentiment, stamp it closer to the right side to allow room for the banner edge.

Next, create a banner edge on the left side of the sentiment. Cut a straight line from the edge to where you want your banner "V" to end.

Next, cut diagonally from one corner to the end of your first cut.

Then, do the same thing from the other corner.

Glue the sentiment banner to the lower half of the card base using Stampin' Dimensionals.

As an accent, tie a bow using Baker's Twine or other ribbon, and glue to the sentiment using a Glue Dot.

Since this is a darker card base, make sure to cut a layer measuring 4"x5-1/4" of Basic White or other light color, to glue to the inside of the card to make hand written messages easier to read.
